[Portfolio](#) — [LinkedIn](#) — [Google Scholar](#)

PROFESSIONAL SUMMARY

Computer Science PhD researcher and AWS Certified Cloud Practitioner specializing in Computer Vision, Multi-modal Data Fusion, and Generative AI. Proven track record of publishing high-impact research (with 11 publications in the pipeline) and deploying scalable AI workflows for real-world applications including healthcare, autonomous monitoring, and financial infrastructure.

EDUCATION

Doctor of Philosophy in Computer Science

Aug 2024 – May 2027 (Expected)

University of Dayton, OH

GPA: 3.96

- **Research Focus:** Saliency Detection, Scene Graph Generation, Visual Working Memory, Multi-modal Data Fusion.
- **Awards:** Research and Scholarship Award (Doctoral Student).

Masters of Science in Computer Science

Jan 2022 – Dec 2023

University of Dayton, OH

GPA: 4.00

- **Awards:** Outstanding Graduate Student in Computer Science Award.

Bachelor of Engineering in Information Technology

May 2021

Shri Ramdeobaba College of Engineering and Management, India

GPA: 3.66

RESEARCH & INDUSTRY EXPERIENCE

Graduate Research Assistant (PhD)

Aug 2024 – Present

University of Dayton, OH

- Developed the SeMemo dataset using Generative AI to disentangle semantic content from low-level visual features for Visual Working Memory (VWM) analysis, evaluating human memory fidelity via a change detection paradigm.
- Engineered a comprehensive multi-modal house price prediction framework integrating street-view visual features, interior attributes, and macro-economic data using XGBoost and Neural Networks.
- Spearheaded the development of the AEye system, a specialized framework for automated avian monitoring utilizing high-resolution streaming video data analysis.
- Researched object-level visual attention and saliency detection by leveraging Scene Graphs and large-scale vision-language models like Kosmos-2 for advanced scene understanding.

AI in Action Job Simulation

Jan 2026

Vista Equity Partners (Remote)

- Applied Vista's four-part prompt engineering framework (Ask, Context, Examples, Desired Output) to synthesize customer NPS survey feedback into executive-ready insights, improving clarity and relevance of outputs by > 50%.
- Designed and tested repeatable GenAI workflow automations for news aggregation, data reconciliation, and qualitative insight summarization using ChatGPT and Copilot.
- Evaluated AI-generated outputs for accuracy and tone, implementing guardrails and refinement techniques that significantly reduced error rates and increased stakeholder usability.

Graduate Research Assistant (Master's)

Aug 2022 – Dec 2023

University of Dayton, OH

- Directed high-impact computer vision systems, achieving 89% accuracy in traffic video anomaly detection, and developed robust models for cryptocurrency price prediction.
- Implemented advanced machine learning and data analysis algorithms for model optimization, boosting overall working efficiency by 20%.
- Compiled and processed a dataset of 10,000 annotated images and 5,000 hours of video footage to train real-time detection models.

Research Intern

June 2022 – July 2022

Tan Tock Seng Hospital, Singapore

- Navigated healthcare data science analysis on three distinct datasets containing 2,000+ patients each, extracting valuable diagnostic insights.
- Developed an automated image segmentation tool and streamlined data processes using ImageJ (Fiji) and R, facilitating Granuloma detection across 60,000+ medical images.

TEACHING & ACADEMIC LEADERSHIP

Graduate Teaching Assistant / Lead Instructor

Aug 2025 – Present

University of Dayton, OH

- Served as the Lead Instructor for hands-on Python laboratory sessions, delivering technical lectures to undergraduate and graduate Computer Science students.
- Designed course lab materials, managed student inquiries, and provided technical guidance for software implementation via office hours.

Academic Service & Mentorship

Jan 2024 – Present

University of Dayton, OH

- Actively served as a technical reviewer for academic conferences in Computer Vision and Machine Learning, evaluating novel research submissions for methodology, rigor, and impact.
- Mentored junior graduate students within the vision lab, providing hands-on guidance with experimental design, algorithm implementation (PyTorch, OpenCV), and the academic publication pipeline.

TECHNICAL SKILLS

- **AI & Machine Learning:** Generative AI, Prompt Engineering, LLMs (Kosmos-2), Saliency Detection, Scene Graph Generation, Multi-modal Data Fusion, Deep Learning, XGBoost.
- **Computer Vision:** Image Memorability Analysis, Object Detection (Adverse Weather), Image Restoration, Motion Analysis, Seam Carving.
- **Programming Languages:** Python (PyTorch, TensorFlow, Keras, OpenCV), C, C++, MATLAB, Java, SQL, R, Kotlin.
- **Tools & Infrastructure:** AWS (EC2, S3, RDS), Linux, LaTeX, Android Studio, Git, Tableau, ImageJ (Fiji).

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — **Cisco Data Analytics Essentials** — **Microsoft Technology Associate (MTA): Cloud & Networking Fundamentals**
